

# Outcomes

There was a very interesting round table discussion between the delegates of ACAC states and the representatives of EGISAVIA, French DGCA and the following recommendations could be extracted as conclusions from the seminar:

- ACAC Air Navigation Committee (ANC) has to explore the Implementation of CDM , A-MAN , D-MAN in ACAC area.
- ACAC has to encourage the exchange of experience and knowledge regionally by arranging common events on important ATM technologies;
- ACAC has to encourage States to develop Gap Analysis, road Map for implementation of CDM on the adequate airports.

# Outcomes

- ACAC states are invited to:
  - Consider the implementation of CDM, D-MAN, especially in airport with high traffic density, which will bring more capacity and operational efficiencies.
  - Shares experience and trials results in CDM Project.
  - Conduct Safety Assessment at the earliest time for new CDM implementations.
